INTRODUCTION

CALIFORNIA CITIES, TOWNS AND COUNTIES was designed to provide concise yet comprehensive one page profiles for all incorporated places (cities and towns) and counties in California. With new cities incorporating yearly, the number of municipalities in the book will increase each year. A profile page for a city will be added the first year there is revenue and expenditure information available, which is usually a full year after the date of incorporation. This year the newly incorporated cities of Highland, Mission Viejo, Santa Clarita and Twentynine Palms have been added to the book for a total of 448 municipal profiles and 58 county profiles, with San Francisco falling under the categories of both a city and a county.

Of the 58 counties, three (Alpine, Mariposa, and Trinity) have no incorporated places at all, and of the remaining counties the number of incorporated places ranges from one each in the counties of Calaveras, Del Norte, Inyo, Lassen, Modoc, Mono and Plumas, to 85 in Los Angeles County.

The book contains one page for every city, town and county in the state. These pages are arranged alphabetically by city or county name within the municipal or county profiles sections. Each page has the same format which organizes the data into eight categories, with the result being that information about a specific city or county can be found rapidly, and comparisons can be made easily. Following the county profiles section there are two appendices. Appendix A contains the names and party affiliations of elected representatives to Congress, the State Senate and the State Assembly. Appendix B contains information on all the school districts listed on municipal profile pages as also serving that city. The school districts in Appendix B are arranged alphabetically by name of the district.

INTRODUCTION TO THE DATA

The information in this volume has been obtained from a variety of sources. In order to maximize the usefulness of the volume it is important to disclose where each piece of information came from. This is especially important to researchers who have questions about how the data was gathered and what some of the terms used mean. The best answers to these questions are found in the originators of the data which we will cite in the Explanation of the Categories to follow.

It is also important to cite the year of the data. In all cases this is the latest year for which complete data was available for all local governing bodies as of November 30, 1989. Except for the 1980 Census data, most data is from 1988 and 1989, and most of the dates are indicated in the headings themselves.

EXPLANATION OF THE CATEGORIES

Demographics & Socio-Economic Characteristics

The 1988 Population estimates and 1990 & 2000 Population projections (on county pages) were prepared by the California Department of Finance, Population Research Unit. The 1985 income figures are the most recent estimates from the U.S. Bureau of the Census. All other information in this first column comes from the 1980 U.S. Census.

In order to fully appreciate census information, it is important to understand how the Bureau collects its data and defines its terms.

All U.S. households receive a census questionnaire. In 1980, approximately 81% received a short form with 19 basic questions about age, race, sex, marital status, and the like, along with some basic questions about the housing unit that was occupied. Approximately 19% of all households received a long form which included the basic 19 questions along with 46 others, for a total of 65. These additional questions concerned educational attainment, occupation, income, labor force status, as well as more detailed housing questions. Response to the basic 19 questions, which appeared on all forms, constitute 100% or complete count data. Results from the remaining 46 questions constitute sample data, which is used to estimate totals. Most items on the profile page are based on complete count data, however, some items are based on sample data. Educational attainment, households receiving public aid, households receiving social security income, income and poverty information, and civilian labor force data are all based on responses to questions on the long form. However, all other information is complete count data. (Interested readers should note that in order to maintain statistical reliability in places of less than 2,500 inhabitants, more than 19% of households receive the long form.)

To supplement its results and explain terminology, the Bureau has provided a 67 page glossary of terms which is incorporated into their valuable User's Guide. The glossary is a comprehensive and informative dictionary, and the definitions provided below are based on its entries.

Race, as used by the Bureau of the Census is not meant to denote any scientific or biological concept of race. The sub-groups displayed here represent the self-categorization of respondents. It should also be noted that Spanish origin is not a racial category. Persons may be of any race, and be Spanish origin as well. As a result, only the five sub-groups under race add to the total 1980 population.

Educational attainment reflects the highest grade of school completed by adults 25 years old and older, and is based on responses to long form questions.

A **household** is the person or persons occupying a housing unit. A **housing unit** is the physical structure the people occupy (for further definition, see Housing & Construction below). Not all persons live in households. Some, for example, are members of the armed forces, or are inmates of institutions, or live in group quarters. As a result the total number of persons in a city or town can be greater than the number of persons living in all households of that town. A family is a type of household, one in which two or more persons (including the householder) who are related by birth, marriage, or adoption, live together. Thus, there can be one person households, but no one person families. The subgroups displayed here under households were selected for potential interest and by no means represent a full breakdown of all types of households. Readers should also note that there is overlapping amongst types of households. For example, the same household may have members both under 18 years of age and over 65.

Income and poverty data are derived from responses to questions appearing on the long form. The term **income** includes income of all types: salary and wages, business and farm, dividend and interest, income from government programs, and all other types of income. **Poverty** status has been determined by the Bureau by comparing income with certain federally established threshold levels. These levels, when taken as a group, are referred to as the poverty level or the poverty line. Persons with income below the threshold levels are considered to be in poverty. The levels themselves vary according to household size, number of children, and age of the householder, and are adjusted each year in accordance with the consumer price index. Displayed on the profile page is the total number of all persons below the poverty line.

The **civilian labor force** is comprised of all persons 16 years old and older who are not in the armed forces and are either employed or unemployed. Employed persons are those who are at work at a job or business, or those who are temporarily absent from work due to illness, vacation, strike, or personal reasons. Thus for the Bureau, those persons who perform their own housework, schoolwork, or volunteer work for religious, charitable or similar organizations are not classified as employed. They are either not a member of the labor force or they are unemployed. Unemployed persons are those who are seeking and able to accept work. Self employed persons are those who work for profit or for a fee in their own unincorporated business, trade, profession or farm.

General Information

The address and telephone number shown are for the central location for municipal or county business i.e., the city hall, city administrative offices, county court house or county administrative offices. Area for cities is provided where available from information published in the California Library Directory, 1986, California State Library. County land and water areas come from the California Department of Water Resources, Division of Planning.

Type of government was taken from the California Roster, 1985, published by the Office of the Secretary of State. General law cities derive their power based on acts of the state legislature. Their powers are enumerated and structure specified by state Government Code. Charter cities are formed by citizens adopting a charter and establishing the organization of the basic law of the city. The state legislature has less control over the charter cities' local affairs.

General law counties elect members of their Board of Supervisors by district, and charter counties have the option of electing their Board members by district or at large.

Voters & Government Officials

Registered voter data was compiled from information provided by the Office of the Secretary of State, Board of Elections, in their "Report of Registration", dated March, 1989. Numbers do not add to total because not all party affiliations are shown, only Democrat and Republican.

The numbers of the legislative districts which fall within the boundaries of each municipality or county are from the office of the Senate Democratic Caucus and the Speaker's Office of Majority Services. Names of the office holders for each district, and their party affiliation, are based on current (November, 1989) information provided by the office of the Secretary of State and can be found in Appendix A, following the section of the book on County Profiles.

Local and county officials' names, and names of the members of the county Boards of Supervisors were gathered from a mail and telephone survey done in November, 1989, by the editor. In each county there are five members of the Board of Supervisors and they represent specific districts within the county. However, San Francisco is a consolidated City and County and has eleven members on their Board of Supervisors who are elected at large and do not represent specific districts.

Public Safety

The names of the Police and Fire Chiefs (municipal pages) and Sheriffs (county pages) come from our mail and telephone survey done in November, 1989. Sworn officers, Total Crimes, and Total Violent Crimes come from 1988 statistics provided by the California Department of Justice, Bureau of Criminal Statistics.

Firefighter information was compiled from a list provided by the State Fire Marshal's office. Cities showing N/A in either the Police or Fire sections have no municipal police or fire department, and usually have contracted with the county sheriff's department or county fire marshal or another municipal police or fire district for these services. The abbreviations M/Paid or M/Vol. stand for mostly paid or mostly volunteer.

Public Library

All information on libraries, both city and county, was taken from California Library Directory, 1989 and California Library Statistics, 1989, published by the Library Development Services Bureau of the California State Library, Sacramento, California, 1989. Municipal profile pages include information on city public libraries only. Where there is no city library, "Served by County Library" indicates a branch of the county library is located there or serves the community. County library information is shown on the County Profile pages. 'Number Branches' includes branch outlets of the main library, and stations, which are smaller than branches.

Housing and Construction

All data under Housing Units, 1980 comes from the 1980 U.S. Census.

A housing unit is a house, apartment, mobile home or trailer, group of rooms, or single room occupied as a separate living quarter or, if vacant, intended as a separate living quarter. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building, and which have direct access from the outside of the building or through a common hall. A year round housing unit is one intended for year-round use, and excludes seasonal and migratory housing units. Three different characteristics of year-round housing units have been selected for display here. It should be noted that these three characteristics are from sample data of the U.S. Census (see Demographics & Socio-Economic Characteristics above).

Statistics for New Privately Owned Housing Units Authorized by Building Permit come from annual U.S. Bureau of the Census reports for 1986, 1987, and 1988. Places which issue building permits are asked to report monthly to the Bureau. County profile pages show building permits issued by the county for unincorporated areas only.

Municipal Finance/County Finance

Information in this category for cities has been taken from the Annual Report of the State Controller Financial Transactions Concerning Cities of California for fiscal year 1987-88. The information published by the State Controller was extracted from reports prepared by city fiscal officers and submitted to the state. We have used figures from the Total Revenues and Total Expenditures columns for all line items in our Municipal Finance section.

County Finance information comes from Counties of California, Financial Transactions Annual Report, 1987-88, also published by the State Controller. Here again the State Controller extracts the data from reports filed by county Auditors. We have used their terminology 'Financing Sources' and 'Financing Uses' and our data comes from their Totals column for each line item.

Financial information for both the City and County of San Francisco is shown on the San Francisco municipal profile page only.

School System

Name, address, telephone number, name of superintendent, and grade plan of public school districts were taken from California Public School Directory, 1989, published by the California State Department of Education, Sacramento, California. Many cities are served by more than one public school district. If the Public School Directory showed a district had at least one school located in the city on the profile page, we show that district as serving that city. Due to space limitations, expanded information about only one school district can be shown on each profile page. The district shown on the profile page will be either the only district for that city, or the district with the highest grade level. If there are other districts serving the municipality, they are listed at the bottom of the page and information about the districts can be found arranged alphabetically by name of district in Appendix B in the back of the book.

The following will help clarify the terminology used in the school district names: A **unified** school district includes both elementary and high school educational levels. An **elementary** school district usually includes kindergarten and grades one through six or eight. A **high school** district usually includes grade nine and above but may include grade seven and above. The word **union** in the name of an elementary school district indicates that it was formed from two or more districts. The word **union** in the name of a high school district indicates that it includes two or more elementary school districts. A **joint** district includes territory from more than one county.

All other information displayed under headings for this section comes from data provided by the California State Department of Education, Program Evaluation and Research Division, and is for the school year 1988-89 except where indicated for 1988 only.

Enrollment includes all regular day school students enrolled for all grades in the district.

High school graduates shows graduates for 1988, the latest year available, in districts that have high schools.

Full time teachers includes people who teach full time plus the sum of all other teachers expressed as full time equivalents.

Pupil teacher ratio shows the number of pupils per teacher and was reached by dividing the number of pupils by the number of teachers.

Average teacher salary includes only those teachers who are teaching full time and excludes the sum of full time teacher equivalents.

Per pupil expenditure is computed by the California Department of Education, Local Assistance Bureau and is based on the amount spent for education divided by the number of students in average daily attendance (ADA) to give an average cost per pupil in the district.

District average CAP (California Assessment Program) reading scores for grade 8, 1989, were provided by the State Department of Education, Division of Planning, Evaluation and Research. Scores for districts can range from 100 to 400, with percentile showing where that district falls in comparison with all other districts in the state, i.e., a percentile of 77 means 77 percent of California districts had a score lower in 8th grade reading.

SAT (Scholastic Aptitude Test) scores for grade 12, 1989, were also provided by the Program Evaluation Division and are weighted averages for all high schools in the district. Maximum scores in verbal and math are 800 each. On the county profile pages the SAT scores shown are the weighted averages of all the high schools in the county and were computed by the Program Evaluation Division.

The goals of education are complex, and standardized tests are available to measure the degree of attainment of only a few of those goals. Standardized test scores should not be the only criteria used to evaluate a total educational program. The reader must realize that only a small amount of the information that is required for a total evaluation process is provided in district profiles, and for a more in-depth look, should talk with the districts directly and do extensive research of all data available from the schools, the districts and the California Department of Education.

DISCLAIMER

CALIFORNIA CITIES, TOWNS AND COUNTIES contains thousands of pieces of information. Every reasonable precaution, along with a good deal of care was taken in its preparation. Despite all efforts it is possible that some of the information contained in this book may not be accurate. Some errors may be due to errors in the original source materials, others may have been made by the compilers of this volume. An incorrect spelling may occur, a figure may be inverted and similar mistakes may exist. The compilers, editors, typist, printers, and others are all human, and in a work of this magnitude the possibility of error can never be fully eliminated.

If any piece of information is believed to be inaccurate, please contact the publisher. We are eager to eliminate any errors from coming editions and we will be pleased to check a piece of information.

The publisher is also aware that some users may apply the data in this book in various remunerative projects. Although we have taken all reasonable, responsible measures to insure total accuracy, we cannot take responsibility for liability or losses suffered by users of the data. The information provided here is believed to be correct at the time of publication. No other guarantees are made or implied. The publisher assumes no liability for losses incurred by users, and warrants only that diligence and due care were used in the production of this volume.
